

DR-306

NORUMEL THINNER (ALKYD ENAMEL THINNER)

It is a thinner for NORUMEL (synthetic alkyd enamel) and natural-drying type anti-corrosive primer. It is the most typical thinner for alkyd enamel composed mainly of aliphatic and aromatic hydrocarbons.

Usage

Alkyd enamel paint thinner

Specification

Distillation curve	Category	°C
	Initial Boiling Point	More than 150
	Temperature at 90% Outflow	Less than 210
	Final Boiling Point	Less than 230
Specific gravity	Approx. 0.85 (distillation temperature range may change considering workability and solvency without notice.)	

Product Properties (Physical Property Data)

Enamel thinner	Excellent dilution of enamel paint
----------------	------------------------------------

How to Use

How to Use	<ol style="list-style-type: none">1. Add a specific amount to the enamel paint depending on the type of work.
Remarks	<ol style="list-style-type: none">1. Wear protective gear and ventilate sufficiently to prevent inhalation by scattering.2. The product is inflammable and thus vulnerable to fire. Never keep or use the product near fire. Make sure to avoid sparks by impact, dropping, or friction upon handling.3. Do not mix with other thinners.4. Fully understand the MSDS before handling the product.
